Comments:

Reviewer 1:

Reviewer's Comments to Author		Authors Response/Changes in manuscript/Page no/paragraph no.
Originality:	It is contributing to new knowledge and wide area of the information is covered on the selected topic.	sincerely appreciated
Scientific Quality:	Though the information is wide and all aspects are covered but thorough comprehensive details need to be added in order to publish in this journal as per journal guidelines.	added minimum 4 lines in each topic
Relevance to the Field(s) of this Journal:	This article manuscript (Article on Rheumatoid Arthritis) is matching the field covered by this journal.	sincerely appreciated
General Comments:	Presented manuscript need to undergo comprehensive review from english grammar point of view.	modified
Reviewer's Decision	Minor revisions needed	revised
Minor revisions needed	As mentioned above article sounds scientifically good but need modification from english writing point of view.	revised

Reviewer 2:

Reviewer's Comments to Author		Authors Response/Changes in manuscript/Page no/paragraph no.
Originality:	Author work is appreciable and provides sufficient information which is fruitful.	sincerely appreciated

Scientific Quality:	<ol style="list-style-type: none"> 1. Abstract and introduction length is not enough. More details should be highlight in abstract . 2. Figures are not cited in the text. An explanation for tables should be written in review body. 3. Plagiarism is around 22 %, which is not acceptable. So, again work on manuscript and plagiarism should be less than 20%. 4. Add at least one table related to concluded data. 5. References are quite older and already cited in many papers. Add some fresh studies in “clinical finding” and “treatment”. 	<ol style="list-style-type: none"> 1. Abstract edited 2. edited 3. revised 4. included lines in conclusion text 5. revised
Relevance to the Field(s) of this Journal:	Manuscript is completely relevant with this journal.	sincerely appreciated
General Comments:	In this manuscript authors have included a number of sections with detail and background of arthritis which helpful for reader and future research.	sincerely appreciated
Reviewer’s Decision	Manuscript is acceptable with minor revision.	revised

Reviewer 3:

Reviewer’s Comments to Author		Authors Response/Changes in manuscript/Page no/paragraph no.
Originality:	I appreciate work of the author. I found author did great work to club things together but the manuscript has 29% plagiarism which could be reduced by the author for publication.	revised
Scientific Quality:	It has average scientific quality.	revised
Relevance to the Field(s) of this Journal:	Rheumatoid Arthritis & its Aspiratory Affiliations is one of the majour challenges in the pharmaceutical industry and is pioneer area of research and therapeutics thus it has relevance to Journal of Pharmaceutical Research and Therapeutics	sincerely appreciated

General Comments:	Author should reduce plagiarism. Current formulation and therapies should be included in the manuscript Add diagrams in explaining pathophysiology Add future prospective section in the text Abstract should be modified Grammar and language need to be improve in the manuscript.	revised and modified
Reviewer's Decision	The manuscript could be published in journal after addressing the comments	revised
